INSTITUTE OF
GLOBAL HEALTH
INNOVATION

digital
health
leadership

Part of the **NHS**
Digital Academy

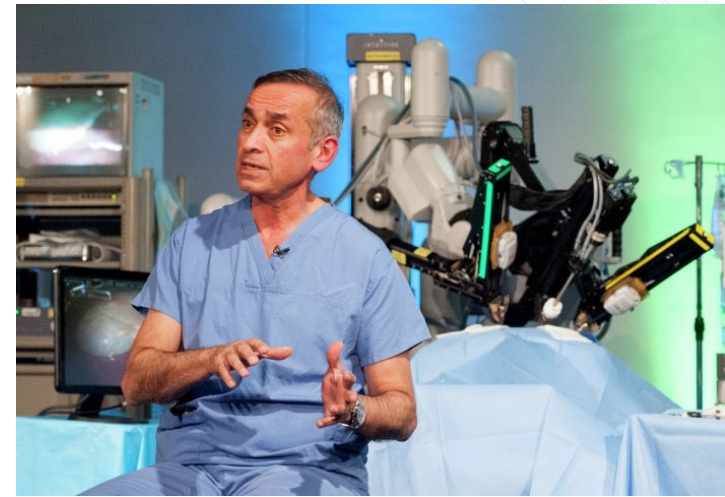

Introduction

The Institute of Global Health Innovation is one of Imperial College's seven "Global Challenge Institutions" tasked with tackling some of the greatest global health challenges facing the world today.

[Video: Celebrating 500+ alumni of the programme](#)

Centres of Excellence:

- Centre for Health Policy
- Climate Cares Centre
- Fleming Initiative
- Hamlyn Centre for Robotic Surgery
- Helix Centre
- NIHR North West London Patient Safety Research Collaboration

Academic Director: Professor Ara Darzi

Head of Programme: Juliette van Wessem

IMPERIAL

A very brief history of the programme

2017

“The Wachter Review”:
[Making IT Work: Harnessing
the Power of Health
Information Technology to
Improve Care in England.](#)

2020-2022

Increased virtual delivery in
cohorts 3 and 4 (due to
COVID-19). ICL & UoE.

2018-2020

Cohorts 1 & 2 delivered by
IGHI at Imperial College
London (ICL), Harvard
Medical School & University
of Edinburgh (UoE).

2022-2025

Cohorts 5-7 delivered by ICL
supported by strategic
partners.

*Recommendation: invest
in the workforce tasked
to deliver digital change
in the NHS.*

IMPERIAL

Ambition

Digital Leadership is critical to the future of the NHS.

Investment in digital infrastructure alongside investment in people.

Equip clinical and non-clinical staff for success when they are assigned to manage digital transformation projects.

Our Participants

Employment requirements:

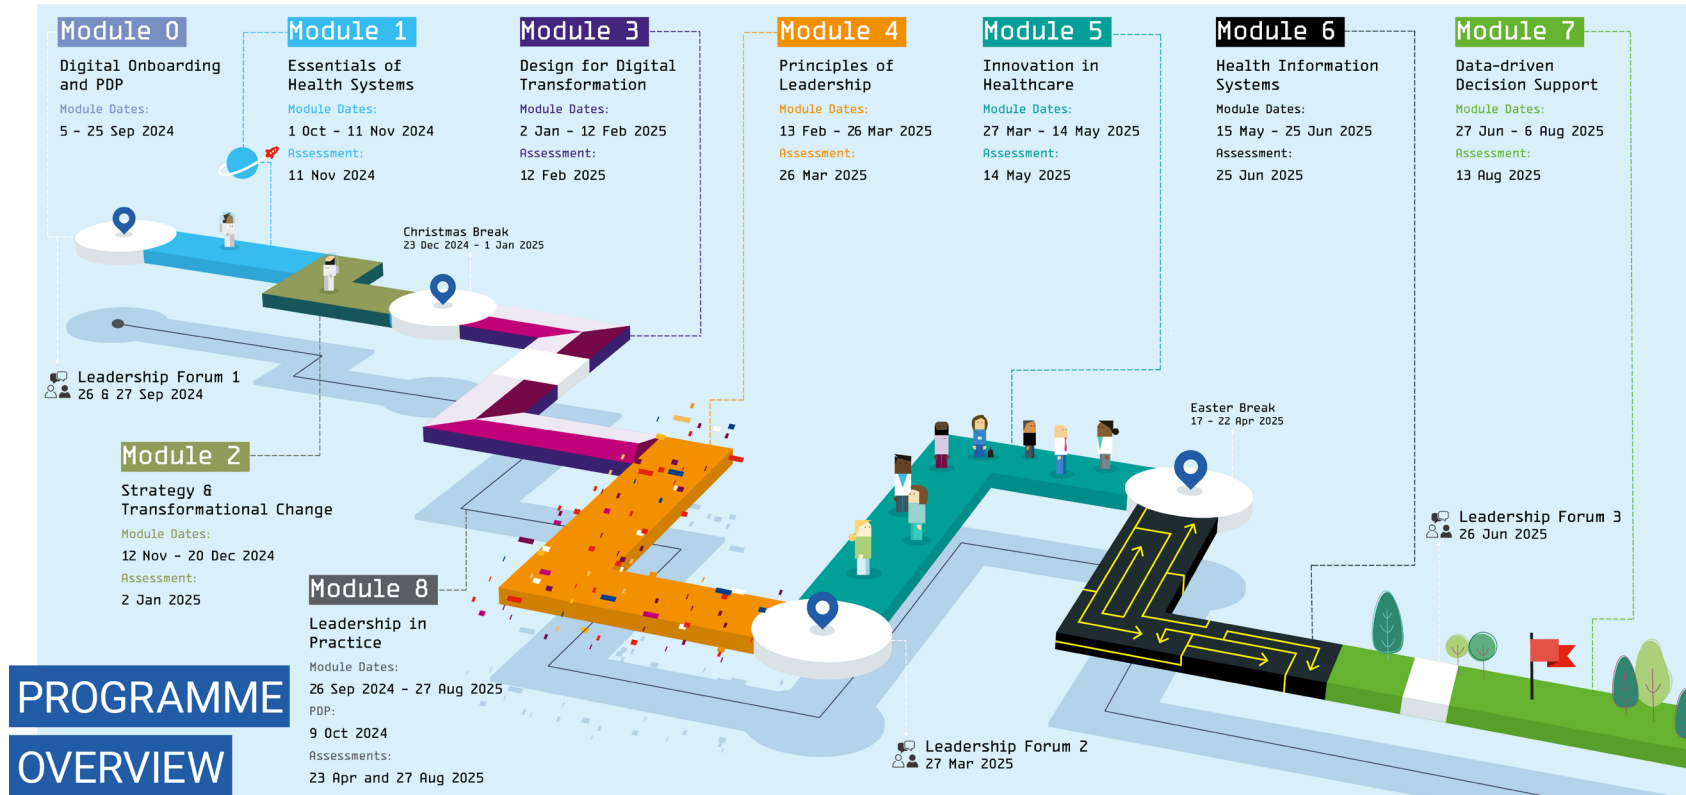

- Participants must either be:
 - directly employed by an NHS organisation as a member of the NHS workforce in England
 - or
 - employed by a social care provider or local authority working across health and care services in England.

The programme is aimed at:

- people who hold a leadership role (accountability and responsibility) for digital and/or digital workforce in their organisation
- people whose ability, intelligence, personality and background mean they are willing and able to learn and apply the stuff we'll teach them
- people who have a strong drive to do the right thing through applying their learning and making an impact
- people in a clinical or non-clinical role, a digital expert role or a combination, but able to demonstrate that the role encompasses both digital and leadership requirements

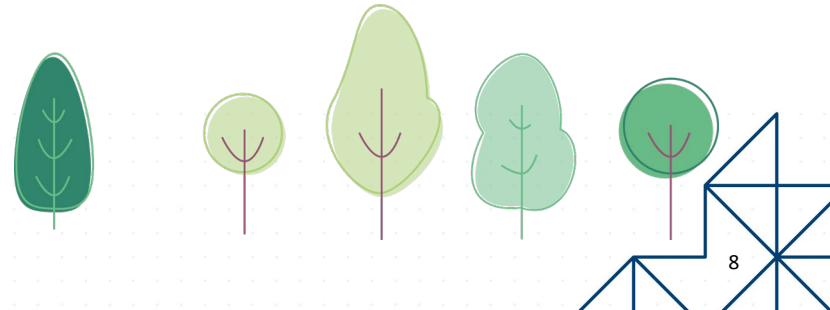

PG Dip in Digital Health Leadership 2024 - 2025

Programme Benefits

The Postgraduate Diploma in Digital Health Leadership is the **premium educational programme** that nurtures a new generation of **highly effective and networked informatics** and **digital leaders** across the clinical and non-clinical spectrum.

- Unique combination of Health Informatics & Leadership Training.
- IGHI offers clinical, managerial, technical and policy expertise.
- Partnerships with world-leading institutions and individuals, in the UK and internationally.
- Theory -> Application (case studies, practitioners, peer support groups)
- Progression to MSc at pro-rata tuition (~£5k)
- FED-IP professional registration as Advanced Practitioner

Industry partners

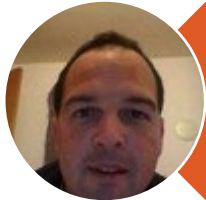

Immediate Impact (current students)

Veronica Pirjol, Digital Health Records Configuration Manager, The Royal Marsden NHS FT

"The Digital Health Leadership Programme with the NHS Digital Academy has profoundly increased my understanding of digital health through meticulously structured modules. It provides the student with the essential tools and skills crucial for effective leadership in the digital health sector."

Keith Wilson, Programme Manager, NHS England

Opportunities like this don't come around often. I have to say that it is a fantastic course which really opens your mind and builds your confidence and leadership skills.

Deimante Sidlauskaitė, Senior Health & Wellbeing Coach / Inequalities Lead, Westcroft Health Centre / South West PCN

The experience has been nothing short of inspirational, providing not only a robust foundation in digital healthcare leadership but also a community of peers passionate about shaping the future of healthcare. We're not just absorbing cutting-edge knowledge; we're applying it in real-time, driving digital innovation within our organisations to make the NHS digitally fit for the future.
